

## Aligned Decodable Sets by Skill

1. Sets are broken up into Sections (i.e. A and B) to show the skills needed for the books to be 100% decodable. Each set has multiple abilities so the reader can grow with practice.
2. Words are listed “out of sequence” if they do not follow the skills listed. These words will need to be introduced to the reader first or have those words read to them.
3. Skills are listed and built upon from one set to the next. All bolded print indicates a new concept/skill/word.
